

## How will M-PAC's advice be used?

The Council and its subcommittees will produce a preliminary report, outlining specific recommendations, to the State Superintendent at the completion of its first year of service and a final report upon completion of its second year of service.

These recommendations will be reviewed and will form the basis of major policy and implementation initiatives in the area of parent involvement statewide, much as the recommendations of the Visionary Panel for Better Schools served as the foundation for the Department's Achievement Matters Most plan.
